Sweet Bee Honey Farm

December 27, 2019 at 10:04 AM

It's Time for some Consumer Education!!

This "Honey" is for sale at our local grocery store. Please take notice of the almost unnoticeable black print. USA, Argentina, Vietnam, Turkey, India, and Ukraine.. These are the Countries of Origin. Large Honey Packers are buying tons of foreign honey and killing the American Beekeeper. This year prices for American Honey have fallen by 30% or more, and its only getting harder to keep our bees alive. If something doesn't change soon, the devaluation of American Honey will be the end of the American Beekeeper.

Please folks, if you can't make it to a local bee farm or farmers market to buy honey, please please look very closely and find the country of origin. Buy only 100% American Honey and support America's beekeepers!!
